The SDM72CT-M Series is a entry level three phase energy monitoring solution with configurable pulse output and RS485 RTU Modbus port.SDM72CT-M series will also measure and display multi-parameters like total active energy(kWh), import and export power (watts) / energy (kWh) , current, voltage, frequency, power factor, etc. Housed for DIN rail mounting, IP51 protection and 5A/100mV current transformer operated.

The required current inputs are obtained via current transformers. This meter can be configurable to work with a wide range of CTs.
